CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

MARCH 1992 COMMISSION REPORT 92-10

Summary

This item is the second edition of *Student Profiles*, which seeks to provide comprehensive information about students in postsecondary education in California. *Student Profiles* contains information on first-time freshmen and transfer students that used to appear in other Commission reports.

The report presents data on students under six categories: (1) All Students, (2) Equity Indexes, (3) First-Time Freshmen and New Students, (4) Transfer Students, (5) Student Outcomes, and (6) Area Specific Student Data. The section on Equity Indexes replaces the "Participation Rate" section of the first edition. The Commission has added this section because of the Commission's ongoing concern with educational equity issues

Unlike most Commission reports, *Student Profiles* contains little analytic comment about its data Instead, the Commission encourages readers to use it as the basis for their own analyses

The Commission discussed this report at its meeting of March 30, 1992. Additional copies may be obtained from the Publications Office of the Commission at (916) 324-4992

Introduction

THIS IS the second edition of *Student Profiles*, issued by the California Postsecondary Education Commission to provide comprehensive information about students in postsecondary education in California *Student Profiles* contains a wide-ranging set of graphs and statistical tables that allows readers to gain an understanding of the characteristics of California students as well as trends in these characteristics, including eligibility for college and university admission, enrollment, transfer, and program completion Unlike most Commission reports, *Student Profiles* contains little textual comment and analysis about the data Instead, the Commission hopes that it will provide the basis for such analysis by others

The primary purposes of *Student Profiles* are fivefold:

1. To provide a context to facilitate policy analysis by presenting a global view of students in California;
2. To permit prompt response to basic inquiries regarding student information,
3. To serve as a basic source of data for research,
4. To function as the Commission's "official" guide to student statistics (that is, by supplying correct, agreed-upon data, even if disagreement exists about how these data might be used in different policy analyses); and
5. To stimulate the production of special topical reports when specific trends in higher education warrant more detailed analysis and description

Organization of the profiles

Student Profiles is divided into these six sections.

1. *All Students*

The first section provides information about all of California's college and university students in order to provide a context for later sections and an overview of how California's student body has changed over the last decade.

2 Section 2 has been eliminated.

2. *Equity Indexes*

The second section contains information about the proportional representation of racial/ethnic groups within three defined categories: (1) first-time freshmen, (2) transfer students, and (3) baccalaureate degree recipients. These equity indexes provide a measure of the proportional representation of a particular ethnic group with that same group's representation in their appropriate comparison category. For example, the first of the three indexes compares for each major racial/ethnic group the number of first-time freshmen who are 19 years old or under with the total number of public high school graduates for the same year. If the equity index for a particular racial/ethnic group equals 1 0, the proportion of first-time freshmen from that group is identical to the group's proportion of high school graduates A number less than 1 0 reflects underrepresentation, and a number greater than 1.0 reflects overrepresentation

The comparison groups for each equity index are as follows:

- *Enrollment Equity Index:* Compares the proportion that any racial/ethnic group represents of a system's enrollment of first-time freshmen who were aged 19 and under with that same group's proportion of all public high school graduates during the same year.
- *Transfer Equity Index:* Compares the proportion that any racial/ethnic group represents of a university's new transfer enrollment with that same group's proportion of credit enrollments in community colleges from four years before
- *Graduation Equity Index:* Compares the proportion that any racial/ethnic group represents of a system's baccalaureate degree recipients with that same group's proportion of the system's undergraduate enrollment from five years before.

3. *First-Time Freshmen and New Students*

This third section includes data that were formerly displayed in the Commission's annual *College-Going Rates* reports In addition to information regarding recent high school graduates, data in this section reflects the origin of new students, average age of all first-time freshmen, and sex and ethnic distribution of new students.

4 *Transfer Students*

This fourth section contains information on community college transfers as well as facts about transfer students from the other segments. The Commission previously published this information in its annual *Update of Community College Transfer Statistics* However, information in this section has been expanded in order to portray a more accurate sense of student flow, including transfers between campuses of the same segment and "reverse transfer" students -- those who begin their higher education in a four-year institution and then transfer to a community college.

5 *Student Outcomes*

The fifth section of this first *Student Profiles* report provides information on student outcomes. Ultimately, the Commission would like to present information beyond simply reporting the number of degrees awarded by California's colleges and universities including graduation rate, student attrition, and persistence information once student-specific data based on unique student identifiers is available In the absence of student identifiers, the Commission intends to include more information in subsequent *Student Profiles* based on the results of its current student cohort study.

6 *Area Specific Student Data*

The sixth and final section of *Student Profiles* provides information on high school graduates and college-going rates by county and on community college transfer students. These tables were previously published in the Commission's annual *College-Going Rates* report and its annual *Update of Community College Transfer Statistics,* respectively.

Selected highlights

While the Commission encourages readers to develop their own analyses of trends in higher education by using *Student Profiles,* a few trends are highlighted here

California and the nation

- California continues to enroll a greater proportion of its residents in postsecondary education than the nation at large 6 1 percent versus 5.4 percent in 1989. This is a trend that has persisted for the last 20 years (Table 1-7)
- A greater proportion of California's postsecondary education students attend public colleges or universities than occurs nationally -- 87.9 percent versus 78.1 percent in 1989 This disparity has existed over the last 20 years (Table 1-6).

California high school students

- While the total number of high school graduates has modestly decreased over the past decade (Table 1-1), the proportional distribution among the Commission's 11 regions has shifted. The Sacramento, San Francisco, Los Angeles, and Orange County regions have declined as a proportion of total high school graduates while the North Central Valley, South Central Valley, Riverside/San Bernardino, and San Diego/Imperial regions have increased as a proportion of total high school graduates (Table 1-8)
- The percentage of public high school graduates who have completed the A-F course pattern, which is necessary to qualify to attend the University of California or the California State University, has increased from 25 5 percent in 1985-86 to 31 4 percent in 1990- 91 (Table 6-6).
- Significant regional differences continue in the percentage of public high school graduates who have completed the A-F course pattern In 1990-91, these ranged from a low of 20 2 percent in the Northern Central Valley region to a high of 37.7 percent in Orange County (Table 1-19).

Characteristics of public college and university students

- Approximately nine out of ten undergraduates at

the University of California attend full-time, while only seven out of ten undergraduates at the California State University do so, as does only one out of every four community college students (Tables 1-2, 1-3, and 1-4)

- Except for four years at the University of California, the proportion of women undergraduates has exceeded their male counterparts in all three systems of public higher education during the past decade (Tables 1-2, 1-3, and 1-4) Women have also outnumbered men in master's and post-baccalaureate programs at the University and the California State University during this time, while the reverse applied for doctoral students and students seeking first professional degrees (Tables 1-14 and 1-15)

- The proportion of undergraduates of color compared to total undergraduates at the University of California and the California State University has increased over the last ten years. During this time, the number of White students has declined slightly at the University and increased slightly at the State University At the California Community Colleges, the proportion of students of color has increased -- but only because the number of White students has decreased (Tables 1-9, 1-10, and 1-11).

- While the enrollment of historically underrepresented students has increased over the past decade, Black undergraduates have grown the least in comparison to all other racial/ethnic groups at the University of California and the California State University At the community colleges, the number of Black students actually decreased by 10,400 -- a 10 7 percent decline since 1981 (Tables 1-9, 1-10, and 1-11)

First-time freshmen and transfer students

- The proportion of new undergraduate students (including both first-time freshmen and transfer students) to total undergraduate students at the University, the State University, and the community colleges has decreased over the last ten years During this same period, the proportion of first-time freshmen compared to transfer students as a component of total undergraduate enrollment, has increased in all three systems (Tables 3-4, 3-6, and 3-7).

- Over the past decade, students from historically underrepresented groups transferred from the community colleges to the University and the State University at lower rates than did White and Asian students (Tables 4-15 and 4-17)

- Over the decade, the proportion of historically underrepresented groups among community college students has continued to be greater than among those community college students who transfer to the University and the State University (Tables 4-10 and 4-12)

Student outcomes

- The University of California awards about one in five of its bachelor's degrees to a student who transferred from a community college. The California State University awards one out of every two bachelor's degrees to a student who transferred from a community college (Tables 5-4 and 5-11)

- Baccalaureate degrees awarded per 1,000 undergraduates has declined for both Black and Latino students over the past decade in the State University and has declined for Latinos in the University during this same period (Tables 5-2, 5-3, 5-9, and 5-10).

Sources of the data

California's colleges and universities are the sources from which the Commission assembles *Student Profiles* The State's public universities and four-year colleges submit all of their enrollment and degree data to the Commission on machine-readable magnetic computer tape The California Community Colleges submit their data to their Chancellor's Office, which currently transmits only their enrollment data to the Commission on tape and their degree data on hardcopy survey forms California's independent colleges and universities submit all of their data to the Commission using hardcopy survey forms generated from the National Center for Education Statistics Integrated Postsecondary Education Data System (IPEDS) of the United States Department of Education.

Categorization of independent institutions

In order to reflect the diversity that exists within California's independent sector of higher education and to facilitate meaningful comparisons with their public-sector counterpart institutions, the Commission arrays data from the State's independent colleges and universities in three groups that are comparable to the public segments The criteria used by the Commission to establish these groups were (1) the set of high school courses required by the institution for admission; (2) the range of acceptable admission test scores for incoming students; and (3) the minimum high school grade-point average required for admission The three groups are:

1. Independent institutions with admission standards comparable to the University of California,
2. Independent institutions with admission standards comparable to the California State University; and
3. Two-year independent institutions.

The following list identifies these institutions by their group classification:

Group 1

1. California Institute of Technology
2. Claremont Graduate School
3. Claremont McKenna College
4. Harvey Mudd College
5. Loyola Marymount University
6. Mills College
7. Occidental College
8. Pepperdine University
9. Pitzer College
10. Pomona College
11. Saint Mary's College of California
12. Santa Clara University
13. Scripps College
14. Stanford University
15. Thomas Aquinas College
16. University of the Pacific
17. University of Redlands
18. University of San Diego
19. University of San Francisco
20. University of Southern California
21. Westmont College
22. Whittier College

Group 2

1. Azusa Pacific University
2. Biola University
3. California Baptist College
4. California Lutheran College
5. Chapman College
6. Christ College Irvine
7. Christian Heritage College
8. College of Notre Dame
9. Dominican College of San Rafael
10. Fresno Pacific College
11. Holy Names College
12. Loma Linda University
13. The Master's College
14. Mount Saint Mary's College
15. Point Loma Nazarene College
16. Southern California College
17. United States International University
18. University of La Verne
19. Woodbury University

Group 3

1. American Academy of Dramatic Arts West
2. Brooks College
3. College for Developmental Studies
4. College of Oceaneering
5. Condie Junior College of Business and Technology
6. Don Bosco Technical Institute
7. D-Q University
8. Fashion Institute of Design and Merchandising
9. Marymount College, Palos Verdes
10. National Technical Schools
11. Queen of the Holy Rosary
12. San Francisco College of Mortuary Science

Data from only those independent institutions that have consistently provided data to the Commission over the last ten years have been included in the following tables, in order to allow trend analyses of the independent sector at large

Finally, because the following information about the independent colleges and universities comes solely from their IPEDS survey forms, which provide data only in aggregate format, the Commission is more limited in how to present it than for public institutions. In addition, those survey forms do not collect all of the information that the Commission

collects through its individual student record data system

Caveats

Three limitations of all the following data should be noted.

- One is simply that the statistics involve actual numbers of students -- "headcount students" -- rather than calculations of full-time-equivalent students
- The second is that while *Student Profiles* includes statistics on students in the State's four major segments of higher education -- the California Community Colleges, the California State University, the University of California, and California's regionally accredited independent institutions -- it does not cover statistics on two other areas of interest to the Commission: (1) the State's private institutions that seldom submit student data to the Commission -- its non-accredited degree-granting colleges and universities, and its non-degree-granting institutions such as business schools and flight-training institutes -- and (2) California students attending college in other states. Both of these types of statistics are needed for *Student Profiles* to present a fully comprehensive picture of college-going behavior on the part of California's young people
- Third, data for some years for some independent institutions have been imputed in order to more accurately portray the student characteristics of these institutions.

Format of the report and availability of data

The Commission publishes *Student Profiles* in a loose-leaf format to fit in three-ring binders so that additional tables can be added easily to the report This allows the Commission's staff to provide updates to particular tables on a more timely and regular basis than might otherwise be possible. In addition to the published report itself, the Commission provides the data contained in this report on floppy disk or magnetic computer tape The data tables and graphics were created using Excel software.

Feedback about the report

Student Profiles is published annually by the Commission as part of its "postsecondary education information clearinghouse" responsibilities. The Commission staff hopes to continue to improve the quality and usefulness of these profiles by soliciting feedback from the systems and others.

The Commission appreciates receiving comments about how to make this report and its other documents more useful as well as feedback about any errors of omission or calculation that should be corrected to make it more accurate Please send your comments to:

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

THE California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature.

Members of the Commission

The Commission consists of 17 members. Nine represent the general public, with three each appointed for six-year terms by the Governor, the Senate Rules Committee, and the Speaker of the Assembly. Six others represent the major segments of postsecondary education in California. Two student members are appointed by the Governor.

As of January 1994, the Commissioners representing the general public are:

Henry Der, San Francisco; *Chair*
C Thomas Dean, Long Beach; *Vice Chair*
Elaine Alquist, Santa Clara
Mim Andelson, Los Angeles
Helen Z. Hansen, Long Beach
Guillermo Rodriguez, Jr., San Francisco
Melinda G. Wilson, Torrance
Linda J. Wong, Los Angeles
Ellen Wright, San Jose

Representatives of the segments are:

Alice J. Gonzales, Rocklin; appointed by the Regents of the University of California;

Yvonne W. Larsen, San Diego; appointed by the California State Board of Education;

Alice Petrossian, Glendale; appointed by the Board of Governors of the California Community Colleges;

Ted J. Saenger, San Francisco; appointed by the Trustees of the California State University;

Kyhl Smeby, Pasadena; appointed by the Governor to represent California's independent colleges and universities; and

Frank R. Martinez, San Luis Obispo, alternate appointed by the Council for Private Postsecondary and Vocational Education.

The student representatives are:

Christopher A. Lowe, Placentia
Beverly A. Sandeen, Costa Mesa

Functions of the Commission

The Commission is charged by the Legislature and Governor to "assure the effective utilization of public postsecondary education resources, thereby eliminating waste and unnecessary duplication, and to promote diversity, innovation, and responsiveness to student and societal needs."

To this end, the Commission conducts independent reviews of matters affecting the 2,600 institutions of postsecondary education in California, including community colleges, four-year colleges, universities, and professional and occupational schools.

As an advisory body to the Legislature and Governor, the Commission does not govern or administer any institutions, nor does it approve, authorize, or accredit any of them. Instead, it performs its specific duties of planning, evaluation, and coordination by cooperating with other State agencies and non-governmental groups that perform those other governing, administrative, and assessment functions.

Operation of the Commission

The Commission holds regular meetings throughout the year at which it debates and takes action on staff studies and takes positions on proposed legislation affecting education beyond the high school in California. By law, its meetings are open to the public. Requests to speak at a meeting may be made by writing the Commission in advance or by submitting a request before the start of the meeting.

The Commission's day-to-day work is carried out by its staff in Sacramento, under the guidance of its executive director, Warren Halsey Fox, Ph.D., who is appointed by the Commission.

Further information about the Commission and its publications may be obtained from the Commission offices at 1303 J Street, Suite 500, Sacramento, California 98514-2938, telephone (916) 445-7933
