1 Documentation of Space Factor Calculations

This volume of material includes three sections. The first section, which comprises most of the volume, presents documentation for the calculation of space factors used in the report, *Survey of Space and Utilization Standards and Guidelines in the Fifty States* The second section includes a blank copy of the telephone survey instrument used to gather preliminary information from all states about their use of space standards/guidelines and their capital facilities budgeting process Blank copies of the data collection and opinion surveys used in our site visits are presented in the third section

We have strived throughout the final report to provide sufficient information for readers to duplicate our calculations of space factors or total assignable square feet used to compare California's space and utilization standards/guidelines to other states To avoid overburdening the final report volume with formulas and calculations, base factors reflecting space allowance for the different categories of space derived by applying the standards/guidelines of each state have been calculated in this section These base factors are presented in the survey report exhibits and adjusted, in accordance with the procedures outlined in Appendix A of that report, to reflect differences in enrollment counting periods and time of day enrollment counts

Calculations are presented by type of institution -- research university, state university, and community college -- in alphabetical order by state, beginning with California. Within each state, calculations are presented for all categories of space for each prototype higher education system Each page presents a single base factor calculation for a prototype system. Each page presents a single base factor calculation for a prototype system, type of space, and one or more levels of student

1 1 *Classrooms and Teaching Laboratories*

General formulas for deriving classroom and teaching laboratory standards are as follows

For community college or state university systems.

(SSS) – (WRH * SOR) = ASF/WSCH

and for research university systems

(SSS * WSCH/FTE) – (WRH * SOR) = ASF/FTE

Where

SSS = Student station size
SOR = Percent time station is occupied
ASF = Assignable square feet
FTE = Full-time student
WRH = Hours rooms are assumed to be used
WSCH = Weekly student contact hours

Most states include allowances for support space, such as equipment storage areas in classrooms or lab preparation space in teaching labs, in their published space standards However, some states provide separate allowance for support space In such cases, student station sizes (SSS) are adjusted on the worksheet tables which follow to reflect these proportional or constant allowances The resulting total assignable square feet per student station (TASF) is then used as the student station size (SSS) in the formula to calculate the base factor space allowance

The calculated base factor (Space Factor) is presented for each discipline for classrooms and teaching laboratories in the far right column on each page At the bottom of each page, a weighted and unweighted average is calculated and presented The unweighted average is the simple mean of all the values in the space factor column The weighted average is derived by applying the proportion of students (far left column of values) in each discipline to that discipline's calculated space factor and adding the results for all disciplines together In this way, other states' standards/guidelines can be viewed in light of an academic program and enrollment mix similar to California's The weighted average space factors for classrooms and teaching laboratories are the base factors presented for each state, prototype

system, and student level in Exhibits 4 2, 4 3, 4 4, 5 2, 5 3, and 5 4 of the survey report Final comparisons are presented in these exhibits after appropriate adjustments have been made for enrollment counting or evening enrollment exclusion differences as described in Appendix A of the survey report Additional adjustments were required for Florida, Maryland, and Virginia for some categories of space and levels of instruction These adjustments were to recognize their practice of applying different factors in the formulas dependent on the size of institution Descriptions of these practices and the calculations of adjustments are presented in this volume of the report immediately preceding the worksheet tables for Florida, Maryland, and Virginia

1 2 *Research Space*

To compare research space standards/guidelines, it was necessary to accomplish two difficult tasks First, space allowances for a variety of demand units in each state (e.g , FTE faculty, graduate student, teaching assistant, etc.) were crosswalked to a taxonomy of programs similar to that of research universities in California. Second, a weighted average space allowance was calculated for each demand unit based on a distribution of enrollments in the taxonomy similar to California's

These weighted averages are presented at the bottom of each page in Exhibits 6 14 through 6 24 of the survey report Applying the weighted average space allowances to the respective demand unit characteristics of the research university system prototype, the total assignable square feet or research space generated by each state's standards/guidelines could be calculated and compared This comparison is presented in Exhibit 6 26 of the survey report.

1 3 *Office Space*

Academic office space standards/guidelines were compared in a way similar to research space standards/guidelines. However, since enrollments in specific disciplines do not affect the calculation of total office space, it was not necessary to include any worksheet tables for this category of space Total assignable square feet for academic office space was calculated by applying each state's space allowances directly to the respective prototype characteristics California was the only state that differentiates among disciplines in its academic office and associated support space allowances This is true for both the California State University and the University of California As a result, it was necessary to calculate weighted values for California's allowances for academic office space demand units in the state university and research university prototype systems Exhibits A and B on pages 3 and 4 present the calculations of these weighted values These values, which include the indicated support space adjustments, are presented in Exhibit 7 1 of the survey report.

2 Telephone Screening Survey to Select States for Site Visits

1. Directions

Through a series of questions, identify the individual in the state who is most familiar with the state's process for determining the level of capital outlay appropriations for higher education facilities After identifying the most appropriate person, call that person Do not accept a substitute, unless it becomes necessary in order to meet project deadlines

2. Introductory Statement and Background Information

This is (name of interviewer) from MGT of America, a higher education management research firm We are conducting a survey of the budgeting practices for higher education and general facilities in other states for the California Postsecondary Education Commission I would like to ask you a few questions about the facilities budgeting practices in (name of state)

In appreciation for your help, California has indicated that they are willing to share a copy of the study with you. the questions will require about 15 to 20 minutes of your time If you do not have time now, I would like to schedule a more convenient time when I can call back

3. Overall Description of Budgeting Process

3 1 Have appropriated or dedicated funds been used for higher education facilities construction, renovation and/or repair in your state within the past 5 years?

☐ Yes ☐ No ☐ DK

(If no, go to section 4, page 4)

3.2 Please briefly describe the major steps for obtaining capital outlay funds for higher education facilities in your state

3 3 What is the current status of space needs for higher education in your state?

☐ pressing need/high priority
☐ no pressing need
☐ have more space than needed
☐ don't know

3 4 What is the outlook for higher education enrollment growth in your state over the next five years?

☐ significant increase
☐ slight increase
☐ no increase
☐ decline
☐ don't know

3 5 How were funds for new construction appropriated in the most recent appropriation bill? (check all that apply)

(a) ☐ lump sum without reference to projects
(b) ☐ lump sum with assumed distribution to specific projects
(c) ☐ specific amounts for specific projects
(d) ☐ other (please describe)

3 6 To which agency or agencies were higher education facility funds appropriated? (check all that apply)

(a) ☐ a state-wide higher education coordinating or governing board for all public higher education institutions

(b) ☐ a state higher education coordinating or governing board for a particular system of higher education

(c) ☐ individual institutions of higher education

(d) ☐ a state building or construction agency

(e) ☐ other (please specify)

(f) ☐ don't know

3 7 What are the *normal* sources of funds for higher education facilities (for Education and General Programs) in your state? (check all that apply)

(a) ☐ Bonds
(b) ☐ State general revenue
(c) ☐ local tax revenue
(d) ☐ dedicated tax funds
(e) ☐ dedicated tuition and fee revenues
(f) ☐ other (please specify)
(g) ☐ other (please specify)
(h) ☐ don't know

3 8 What are the *major* sources of funds? (check all that apply)

(a) ☐ Bonds
(b) ☐ State general revenue
(c) ☐ local tax revenue
(d) ☐ dedicated tax funds
(e) ☐ dedicated tuition and fee revenues
(f) ☐ other (please specify)
(g) ☐ other (please specify)
(h) ☐ don't know

3 9 If bonds are a major source, what revenue sources are utilized to make the bond payments? (check all that apply)

(a) ☐ State general revenue
(b) ☐ dedicated state tax funds
(c) ☐ dedicated institutional tuition and fee revenues
(d) ☐ institutional general fund revenues
(e) ☐ other (please specify)
(f) ☐ other (please specify)
(g) ☐ don't know

4. Basis for Appropriations

4 1 Do space standards or guidelines for education and general facilities exist in your state at either the institution or state level? (If a "no" answer is received, probe to make sure "no" is the correct answer)

☐ Yes (skip to question 4 3)
☐ No
☐ DK

4 2 If no, what basis is used to determine the amount of funds to budget for facilities?_____

(Go to Question 6 1, page 11)

4 3 Are the standards or guidelines used in the budgeting process for facilities?

☐ Yes
☐ No
☐ DK

4.4 Who uses the standards or guidelines? (check all that apply)

(a) ☐ individual institutions
(b) ☐ systems of higher education
(c) ☐ executive budget office
(d) ☐ legislature
(e) ☐ other (specify)

4 5 Are the same standards or guidelines used by

community colleges? ☐ Yes ☐ No ☐ DK

teaching or regional universities? ☐ Yes ☐ No ☐ DK

graduate research universities? ☐ Yes ☐ No ☐ DK

4.6 For which of the following purposes are standards or guidelines used? (check all that apply)

(a) ☐ campus facilities planning and management?

(b) ☐ building project design?

(c) ☐ preparation of institutional facility budget requests?

(d) ☐ preparation of education system budget requests?

(e) ☐ preparation of Governor's facility budget recommendations?

(f) ☐ preparation of legislative appropriations for education facilities?

(g) ☐ allocation of funds to specific institutions?

(h) ☐ allocation of funds to building projects?

5. Information about Space Standards or Guidelines for Higher Education

(If no space Standards or Guidelines are used in the state, skip to Section 6, page 11)

5 1 Are *existing* space standards or guidelines for higher education facilities generally accepted by·

(a) institutions of higher education? ☐Yes ☐No ☐DK

(b) State coordinating/ governing bodies? ☐Yes ☐No ☐DK

(c) State building or construction authorities? ☐Yes ☐No ☐DK

(d) Governor's budget office? ☐Yes ☐No ☐DK

(e) legislature? ☐Yes ☐No ☐DK

(f) other? (please specify) ☐Yes ☐No ☐DK

5 2 Who developed the standards or guidelines? (check all that apply)

(a) ☐ institutions

(b) ☐ State coordinating or governing body

(c) ☐ State building or construction authority

(d) ☐ Governor's budget office

(e) ☐ legislature

(f) ☐ outside consultant

(g) ☐ joint committee consisting of representatives from

(h) ☐ other (please identify)

(i) ☐ don't know

5 3 How long have the space standards or guidelines been utilized in planning and budgeting for higher education facilities in your state?

☐ less than 5 years

☐ 5 to 10 years

☐ more than 10 years

☐ don't know

5 4 When were the space standards or guidelines last updated?

☐ within past 5 years

☐ 5 to 10 years

☐ more than 10 years

☐ don't know

5 5 Do standards or guidelines exist for classroom space?

☐ Yes

☐ No (skip to question 5 9)

☐ don't know

5 6 Are the standards or guidelines for classrooms based on enrollments?

☐ Yes (skip to question 5 8)

☐ No

☐ don't know

5 7 If no, what is the basis?

5.8 Do the standards or guidelines vary by

	Two Year Colleges	Four Year Institutions
(a) disciplines or program speciality groupings	____	____
(b) course level?	____	____
(c) student level?	____	____
(d) size of institution	____	____

(f) other? (please specify)	____	____
(g) don't know	____	____
(h) does not vary (e g , same for all cases)	____	____

5 9 Do standards or guidelines exist for teaching labs?

- ☐ Yes
- ☐ No (skip to question 5 13, page 8)
- ☐ don't know

5 10 Are the standards or guidelines for teaching labs based on student related factors?

- ☐ Yes (skip to question 5 12)
- ☐ No
- ☐ don't know

5 11 If no, what is the basis? ____

5 12 Do the standards or guidelines vary by (check all that apply)

(h) does not vary (e g , same for all cases)	____	____

5 13 Do standards or guidelines exist for research labs?

- ☐ Yes
- ☐ No (skip to question 5 16)
- ☐ don't know

5 14 What are the bases for the standards or guidelines for research labs? (check all that apply)

- (a) ☐ research expenditures
- (b) ☐ faculty research positions
- (c) ☐ graduate enrollments
- (d) ☐ number of research technicians
- (e) ☐ number of post doctorate students
- (f) ☐ other

5 15 Do the standards or guidelines differ by (check all that apply)

	Two Year Colleges	Four Year Institutions
(a) disciplines or program speciality groupings?	____	____
(b) size of institution?	____	____
(c) other? (please specify)	____	____
(g) don't know	____	____
(h) does not vary (e g , same for all cases)	____	____

5 16 Do standards or guidelines exist for office space?

- ☐ Yes
- ☐ No (skip to question 6 1, page 11)
- ☐ don't know

5 17 What are the basis for the standards or guidelines for office space? (check all that apply)

On-Site Opinion Survey Instrument

SECTION 1 PURPOSE OF SURVEY

The purpose of this opinion survey instrument is to obtain information which will enable the project team to understand:

- how space standards or guidelines for classrooms, teaching labs, research labs and offices are used in planning and budgeting for higher education facilities in your state
- how useful current standards or guidelines are in your planning and budgeting process
- how much confidence your organization has in the current standards or guidelines
- what changes, if any, you would like to make in the current higher education facilities budgeting process in your state.

SECTION 2: BACKGROUND INFORMATION

2.1 Name of State

2.2 Name of Person being interviewed

Name

Position

Organization

Telephone #

2.3 Interviewed by

Date

2.4 Role of respondent's organization in higher education facilities budgeting process.

2.5 Role of individual being interviewed.

2.6 How long have you served in

your current position? _____ years

your current organization? _____ years

2.7 How well do you understand the higher education facilities budgeting process in your state?

____ very well

____ well

____ not very well

____ not at all

____ don't know

SECTION 3. DEVELOPMENT OF HIGHER EDUCATION FACILITY STANDARDS AND GUIDELINES

3.1 The current space standards and guidelines were originally developed by (check as many as apply)

____ A special study by

____ A joint committee consisting of

____ Other (please specify)

____ Don't know

3.2 The current space standards and guidelines have been updated.

____ within the last 3 years
____ 3 to 6 years ago
____ 7 to 10 years ago
____ more than 10 years ago
____ never
____ don't know

3.3 Modifications were made during the update to

____ more accurately reflect current institutional utilization rates

____ improve teaching and/or research programs by providing more space

____ incorporate new technological factors

____ force the institutions to operate more efficiently

____ save state dollars

____ refine earlier gross assumptions

____ other (please specify)

____ don't know

3.4 The modifications resulted primarily from

____ institutional initiatives

____ state system initiatives

____ executive branch initiatives

____ legislative initiatives

____ other (please specify)

____ don't know

SECTION 4 OPINIONS ABOUT CURRENT HIGHER EDUCATION SPACE STANDARDS AND GUIDELINES

4.1 Please indicate your level of agreement with the following statements by circling the correct number for each statement.

Statement	Level of Agreement				
	Strongly Disagree	Disagree	Undecided or Don't Know	Agree	Strongly Agree
1 The current standards and guidelines accurately reflect the space needs in our state

SECTION 5. USES OF CURRENT HIGHER EDUCATION SPACE STANDARDS AND GUIDELINES

5.1 Current standards and guidelines are used by institutions of higher education in our state as a basis to (check as many as apply)

____ build legislative budget requests for capital outlay appropriations

____ justify legislative budget requests

____ prepare campus master plans

____ design new construction projects

____ allocate space among university units

____ other (please specify)

____ not used at all

____ don't know

5.2 Current space standards and guidelines are used by state coordinating or governing bodies, as a basis to (check as many as apply)

____ build legislative budget requests for capital outlay appropriations

____ justify legislative budget requests

____ allocate appropriated funds to institutions

____ prepare system wide master plan

____ other (please specify)

____ not used at all

____ don't know

5.3 Current space standards and guidelines are used by the executive branch of our state government as a basis for

____ evaluating higher education capital outlay budget requests

____ developing Governor's budget recommendations to legislature

____ approving capital outlay budget allocations to institutions

____ approving building projects

____ releasing funds for building projects

____ other (please specify)

____ not used at all

____ don't know

5.4 Current space standards and guidelines are used by our state legislature as a basis for

____ establishing annual capital outlay lump sum appropriations to either institutions or systems of higher education

____ establishing capital outlay appropriations for specific construction projects

____ approving building projects

____ releasing funds for building projects

____ other (please specify)

____ not used at all

____ don't know

5.5 Current space standards and guidelines are used by legislative staff for analysis and in making recommendations.

____ yes

____ no

____ don't know

SECTION 6. CURRENT STATUS OF SPACE STANDARDS OR GUIDELINES

6.1 Do you currently have underway any efforts to update or modify the state 's higher education space standards or guidelines?

____ yes

____ no

____ don't know

6.2 If yes, when will the effort be finished? _____

6.3 How often do you feel the standards should be updated? _____

SECTION 7: GENERAL INFORMATION

7.1 What major changes do you feel should be made in the standards or guidelines in your state?

On-Site Data Collection Instrument

SECTION 1 PURPOSE OF SURVEY

The purpose of this survey is to collect detailed information about the formulas and factors used by selected states' systems and institutions of higher education to estimate the amount of classroom, teaching laboratory, research laboratory and academic office space required to meet educational and research needs. The information is being requested in sufficient detail to allow the project team to adjust for differences among the different approaches to derive a comparable set of space factors.

Your cooperation in providing the requested level of detailed information, plus any other information that would be helpful in deriving comparable space factors, is greatly appreciated.

This study excludes all enrollments, programs, and facilities related to Medical, Dental, and V[illegible]ry Medicine schools.

SECTION 4. SPACE FACTORS

In California, the space factors are based on Net Assignable Square Feet, which is the interior measurements of the rooms/spaces included in the pertinent room/space types. Circulation areas, restrooms, etc. are excluded.

4.1 Is your definition of Assignable Square Feet on a Net basis comparable to California? ____ yes ____ no

4.2 If no, please provide your definition

4.2.1 What factor could we use to convert your definition to California's?

4.3 What factor is used to convert your definition of assignable square feet to gross square feet for budgeting purposes?
Factor _____ GSF per ASF

SECTION 5 PLANNING FACTORS FOR DETERMINING CLASSROOM SPACE NEEDS

5.1 Please provide your definition of "Classroom" space in terms of types of space included

5.2 Please show the mathematical equation used to determine classroom space needs.

5.3 Please indicate the numerical value of the factors used to determine classroom space needs by discipline or program specialty groupings for Lower Division F T E. enrollments in the table below (If a totally different set of planning factors are used, please leave table blank and describe in the comment section below)

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

THE California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature

Members of the Commission

The Commission consists of 17 members Nine represent the general public, with three each appointed for six-year terms by the Governor, the Senate Rules Committee, and the Speaker of the Assembly Six others represent the major segments of postsecondary education in California Two student members are appointed by the Governor

As of October 1994, the Commissioners representing the general public are

Henry Der, San Francisco, *Chair*
C Thomas Dean, Long Beach, *Vice Chair*
Elaine Alquist, Santa Clara
Mim Andelson, Los Angeles
Jeffrey I Marston, San Diego
Guillermo Rodriguez, Jr , San Francisco
Melinda G Wilson, Torrance
Linda J Wong, Los Angeles
Ellen F Wright, Saratoga

Representatives of the segments are

Roy T Brophy, Fair Oaks, appointed by the Regents of the University of California,

Yvonne W Larsen, San Diego, appointed by the California State Board of Education,

Alice Petrossian, Glendale, appointed by the Board of Governors of the California Community Colleges,

Ted J Saenger, San Francisco, appointed by the Trustees of the California State University,

Jaye L Hunter, Long Beach, appointed by the Council for Private Postsecondary and Vocational Education

The two student representatives are
Stephen Lesher, Meadow Vista
Beverly A Sandeen, Costa Mesa

Functions of the Commission

The Commission is charged by the Legislature and Governor to "assure the effective utilization of public postsecondary education resources, thereby eliminating waste and unnecessary duplication, and to promote diversity, innovation, and responsiveness to student and societal needs "

To this end, the Commission conducts independent reviews of matters affecting the 2,600 institutions of postsecondary education in California, including community colleges, four-year colleges, universities, and professional and occupational schools

As an advisory body to the Legislature and Governor, the Commission does not govern or administer any institutions, nor does it approve, authorize, or accredit any of them Instead, it performs its specific duties of planning, evaluation, and coordination by cooperating with other State agencies and non-governmental groups that perform those other governing, administrative, and assessment functions

Operation of the Commission

The Commission holds regular meetings throughout the year at which it debates and takes action on staff studies and takes positions on proposed legislation affecting education beyond the high school in California By law, its meetings are open to the public Requests to speak at a meeting may be made by writing the Commission in advance or by submitting a request before the start of the meeting

The Commission's day-to-day work is carried out by its staff in Sacramento, under the guidance of its executive director, Warren Halsey Fox, Ph D , who is appointed by the Commission

Further information about the Commission and its publications may be obtained from the Commission offices at 1303 J Street, Suite 500, Sacramento, California 98514-2938, telephone (916) 445-7933
